**Name of Journal:** *World Journal of Clinical Urology***ESPS Manuscript NO:** 31304**Manuscript Type:** Original Article*Basic Study***Urinary supersaturation as a diagnostic measure in urolithiasis****Otakar Söhnel, Felix Grases****ABSTRACT****AIM:** The objective of this paper is to demonstrate that urinary supersaturation per se is not a reliable diagnostic measure of the risk for stone formation.**METHODS:** Available physical and chemical data for calcium oxalate monohydrate (COM) and calcium hydrogen phosphate dihydrate (brushite, BRU), and urinary supersaturations with respect to COM and BRU in healthy individuals and stone formers, were obtained from the literature. Classical theory of nucleation was used
