Effects of mineralocorticoid receptor antagonists on responses to hemorrhagic shock in rats

Kanako Yamamoto, Takashi Yamamoto, Masayuki Takamura, Soichiro Usui, Hisayoshi Murai, Shuichi Kaneko, Takumi Taniguchi

#### Abstract

#### AIM

To evaluate the effects of mineralocorticoid receptor (MR) antagonists on mortality and inflammatory responses after hemorrhagic shock (HS) in rats.

#### METHODS

One hundred and two male Sprague-Dawley rats were randomly assigned to one of the following three groups: Control, spironolactone (SPL), and enalaprilat (EP). HS was induced by the removal of blood. One half of
