Endocrine hypertension: An overview on the current etiopathogenesis and management options

Reena M Thomas, Ewa Ruel, Prapimporn Ch Shantavasinkul Leonor Corsino

#### Abstract

Endocrine causes of secondary hypertension include primary aldosteronism, pheochromocytoma, cushing's syndrome, hyperparathyroidism and hypo- and hyperthyroidism. They comprise of the 5-10% of the causes of secondary hypertension. Primary hyperaldosteronism, the most common of the endocrine cause of hypertension often presents with resistant or difficult to control hypertension associated with either
