Symplcity-3 hypertension trial: Basic and clinical insights

Benjamin J Scherlag, Sunny S Po

Abstract

Symplcity-3HTN was a recently completed clinical trial that was assumed to be the basis for the approved use of renal artery denervation for the treatment of resistant hypertension in the United States. Dramatic reductions in blood pressure had been reported in two clinical trials (Symplcity-1HTN,-2HTN) carried out in Europe, however Symplcity-3HTN did not show a significant reduction of systolic blood pressure in patients with resistant hypertension 6 months after renal artery denervation as
