Clinical research in febrile neutropenia in cancer patients: Past achievements and perspectives for the future

Jean Kastarsky, Marianne Paesmans, Michel Aoun, Aspasia Georgala, Angela Loizidou, Yassine Lalami, Lissandra Dal Lago

Abstract

Febrile neutropenia is responsible for significant morbidity and mortality. It can also be the reason for delaying or changing potentially effective treatments and generates substantial costs. It has been recognized for more than 50 years that empirical administration of broad spectrum antibiotics to patients with febrile neutropenia was associated with much improved outcomes; that has become a paradigm of
