## JCM | Free Full-Text | The Effect of Preservation ...

<https://www.mdpi.com/2077-0383/8/9/1421/htm> ▾

Despite restoration of oxygen supply, a lower temperature during hypothermic machine perfusion (HMP) or subnormothermic machine perfusion (SNMP) of the liver seems to be associated with slower metabolic rates, thus there is a reduction in conversion of succinate to **fumarate** and reduction in overall electron flow through Complex I to **inter-membrane mitochondrial space**.

Cited by: 1

## [PDF] PERFUSION AND TORPOR TECHNIQUES AS ...

[longevitycryopreservationsummit.com/.../01/Sesion-5-05-David-Gifford-TorporPerfusion\\_PC...](https://longevitycryopreservationsummit.com/.../01/Sesion-5-05-David-Gifford-TorporPerfusion_PC...)

Extracorporeal perfusion as used to recover DCD organs for transplantation How controlled CPB/ELS can replenish energy stores systemically. CPB/ELS could be ideal way to infuse **magnetic nano particles** may facilitate inductive warming of the cryonics patient post storage Truly robust **cryopreservation** is likely to be complex & expensive

## Kidney Preservation: Review of Present and Future Perspective

<https://www.sciencedirect.com/science/article/pii/S0041134513007641>

Static cold storage (CS) and hypothermic machine perfusion (HMP) are the most commonly used techniques for **kidney preservation**. This essay reviews the current use of preservation techniques,
