Successful endovascular treatment of transplant intrarenal artery stenosis in renal transplant recipients: two case reports

Maria Koukoulaki, Elias Brountzos, Ioannis Loukopoulos, Maria Pomoni, Eleni Antypa, Vasileios Vougas, Spiros Drakopoulos

Abstract

Introduction: Transplant renal artery stenosis is a relatively rare complication after renal transplantation. The site of the surgical anastomosis is most commonly involved, but sites both proximal or distal to the anastomosis may occur, as well. Angioplasty is the
