Retrospective Study

Acute antibody-mediated rejection after intestinal transplantation

Guo-Sheng Wu, Ruy J Cruz Jr, Jun-Chao Cai

Abstract

AIM: Antibody-mediated rejection (ABMR) is an increasingly recognized risk factor for allograft failure after solid-organ transplantation. The aim of this study was to investigate the incidence, risk factors and clinical outcomes of acute ABMR after intestinal transplantation (ITx).

METHODS: A retrospective single-center analysis was performed to identify cases of acute ABMR after ITx, based on the presence of donor-specific antibody (DSA), acute
