Manuscript Type: Meta-Analysis

 Living related and living unrelated kidney transplantations: **A systematic review and meta-analysis**

Naser Simforoosh, Hamidreza Shemshaki, Mohammad Nadjafi-Semnani, Mehdi Sotoudeh

Abstract

AIM: This systematic review and meta-analysis was designed to compare the outcomes between related and unrelated kidney transplantations.

METHODS: Literature searches were performed following the Cochrane guidelines. We conducted a systematic review and a meta-analysis, which included ten trials that investigated
