**Impact of antiretroviral therapy on lipid metabolism of HIV-infected patients: Old and new drugs**

Joel da Cunha, Luciana Morganti Ferreira Maselli, Celso Spada, Sérgio Paulo Bydlowski

### Abstract

For HIV-infected patients, the 1990s were marked by the <sup>34</sup>introduction of highly active antiretroviral therapy (HAART) <sup>23</sup>representing a new perspective of life for these patients. The use of HAART was shown to effectively suppress the replication of HIV-1 and dramatically reduce mortality and morbidity, which led to a better and
