Stop chronic kidney disease progression: Time is approaching

Usama Abdel Azim Sharaf El Din, Mona Mansour Salem, Dina Ossama Abdulazim

Abstract

Progression of CKD is inevitable. However, the last decade has witnessed tremendous achievements in this field. Today we are optimistic; the dream of withholding this progression is about to be realistic. The recent discoveries in the field of CKD management involved most of the individual diseases leading the patients to ESRD. Most of these advances involved patients suffering diabetic kidney disease, chronic glomerulonephritis, polycystic
