Lamb's head: the best model for novices education in endoscopic sinus and skull base surgical skills before starting human cadaveric dissections

Neven Skitarelić, Ranko Mladina

Abstract

1 Structured training in endonasal endoscopic sinus surgery (EESS) and skull base
1 surgery is essential considering serious potential complications. We have developed
a detailed concept on training these surgical skills on the lamb's head. This simple
and extremely cheap model offers the possibility of training even more demanding
and advanced procedures in human endonasal endoscopic surgery such as: frontal
sinus surgery, orbital decompression, CSF-leak repair followed also by the naso-
