URINARY NMR SPECTROSCOPY OF A BANGLADESHI COHORT WITH HEPATITIS-B HEPATOCELLULAR CARCINOMA: A BIOMARKER CORROBORATION STUDY

I. Jane Cox, Abil E. Aliev, Mary M.E. Crossey, Mahvish Dawood, Mamun Al-Mahtab, Sheikh M. Akbar, Salimur Rahman, Antonio Riva, Roger Williams, Simon D. Taylor-Robinson.

BIOSTATISTICS STATEMENT

The univariate statistical methods for this study were reviewed by Antonio Riva PhD, Foundation for Liver Research, who has a particular interest in the application of medical statistics. The multivariate analysis techniques were performed using software packages (KnowItAll Informatics System v9.0, Bio-Rad Laboratories, Inc., Philadelphia, USA and SIMCA v14 [Umetrics AB, Umeå, Sweden]) and so these methods were not further reviewed.
