Biostatistics Review certificate

Name of Journal: World Journal of Gastroenterology

Title: Planning the Hepatitis C virus elimination in Cyprus: A modeling study

Authors List: Gountas I, Yiasemi I, Kyprianou E, Mina C, Georgiou C, Katsiolouides P,
Kouroufexi A, Demetriou A, Xenofontos E, Nikolopoulos G

I certify that I have reviewed the statistical methodology of this study and, to my knowledge, all statistical methods and techniques seem appropriate for this research. The authors have already published several papers based on similar methodological approach during the last few years (Gountas I et al. Int J Drug Policy. 2020, Gountas I et al. J Viral Hepat. 2019, Gountas et al. World J Gastroenterol. 2019, Gountas et al. PLoS One. 2018, Gountas et al. J Gastroenterol Hepatol. 2017, Gountas et al. Addiction. 2017). In this manuscript, the authors adjusted their methodology to Cyprus HCV data.

Yours sincerely,

Giota Touloumi

Professor of Biostatistics and Epidemiology

Department of Hygiene, Epidemiology and Medical Statistics

Medical School, National and Kapodistrian University of Athens
