RE: Manuscript titled: "The dynamics of cytokines predicts risk of hepatocellular
carcinoma among chronic hepatitis C patients after viral eradication"

World Journal of Gastroenterology, Editor in Chief

Dear Dr. Editor,

I have reviewed the article by Yu et al., for investigating the dynamics of cytokines predicts risk of hepatocellular carcinoma among chronic hepatitis C patients after viral eradication. I have read the article thoroughly, particularly the part of statistical analysis in the section of method. With a background of epidemiology and biostatistics, I certify that the designs and methods of the work were appropriate. In addition, the tables provided by the team are comprehensive and informative.

Sincerely yours,

Pei-Chien Tsai, Ph.D.
