

Certificate of Statistical Review

7 December 2021

To whom it may concern,

This letter is to confirm that the statistical methods of the present article entitled “*Elevated Levels of Fructosamine are Independently Associated with Coronavirus Disease 2019 Relapse: a 12-month Followed-up Study*” have been reviewed, and the authors have made the corresponding revisions based on my comments. In my opinion, the details on the statistical techniques mentioned in the submitted version of the manuscript are appropriate for research.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Bo Yang'.
