

**To Whom it may concern**

**Name of Journal:** World Journal of Diabetes

**Manuscript NO.:** 87664

**Column:** Case Control Study

**Title:** Advanced glycation end product (Nε-carboxymethyl-lysine) and inflammatory markers (IL-6, TNF-α) and nitric oxide in diabetic versus non-diabetic coronary artery disease patients

This letter is to confirm that I have read the ethics application preparation for this study and that in my opinion the statistical methods and techniques mentioned are appropriate for the study.

Sincerely

**Satabdi Kashyap**
