

January 20, 2018

Dear Editorial board,

The attached manuscript and all of the reviewed materials therein, have been reviewed by Dr. Ettinger for statistical and quantitative correctness. The analysis included were selected prior to study and were chosen based on appropriate statistical design. Power analysis were also completed prior to data collection. Further, for all statistical analysis requiring computation, SYSTAT versions 13, from Systat Software, Inc., San Jose California USA were used. Additionally, we have included a statement and section dedicated towards all of our statistical tests used and usage of computational software.

Sincerely,

Lucas Ettinger
Ph.D
