

Biostatistics Statement

To Whom It May Concern,

Re: Pre-operative visceral adipose tissue radiodensity is a potentially novel prognostic biomarker for early endoscopic post-operative recurrence in Crohn's disease

This letter is to confirm that I have reviewed the biostatistics of this study and, in my opinion, the statistical methods and techniques used in this study are appropriate for the research.

Sincerely yours,

12/27/2023

So Yung Choi, MS

Biostatistician III
