

Name of Journal: *World Journal of Gastrointestinal Oncology*

Manuscript NO: 88343

Manuscript Type: SYSTEMATIC REVIEWS

The Role of Ubiquity-Specific Peptidases in Colorectal Cancer: A Systematic Review

This is to confirm that this manuscript contains considerably basic mathematical calculations only.

Even though it is a systematic review it did not depend on the number of cases as the source articles are focused on the biological and molecular functions of the analysed proteins using techniques such as gene silencing in one model only. This is the classical approach in this field.

Please, see, materials and methods and results for more details.

Sincerely

Wael M Abdel-Rahman, MD, PhD,
Professor, Department of Medical Laboratory Sciences,
University of Sharjah
