<u>Biostatistics Certificate</u>

This is to inform you that the manuscript entitled "**Long-term and non-invasive in vivo tracking of DiD-labeled human hepatic progenitors in chronic liver disease models**" encompasses all the desired and necessary biostatistics which were performed either using Microsoft Excel 2007 or higher and GraphPad Prism software (version 5 and 8.4.2). I am confident that no technical error exists for the data computation reported in this study.

Please let me know if you have any concern for this.

Thank you!

Best Regards,
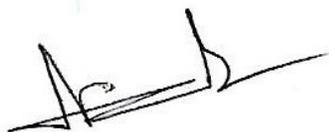

Dr. Aleem Ahmed Khan,
Scientist & Head,
