Biostatistics Statement.

The statistical review of the study was performed by a biomedical statistician. Statistical review has been performed and I attest that following criterias are met:

- (1) Statistical methods are adequately and appropriately described when they are used to verify the results;
- (2) The statistical techniques are suitable or correct;
- (3) Only homogeneous data can be averaged. Mean and Standard deviations are used. The number of observations and subjects (n) are given. Losses in observations, such as drop-outs from the study, are reported;
- (4) The word "significantly" is supported by the P value ($p < 0.05$ indicates statistical significance). Statistical data should be expressed as mean \pm SD or mean \pm SE.

Zaki-Udin Hassan MBBS, MBA

Professor of Anesthesiology
