CERTIFICATE

To whom it may concern

Dear Si/ Madam,

Herewith we would certify that the manuscript of Dr. Alexander N. Kharlamov, M.D. was verified by our Statistical Board and was interpreted as acceptable for publication at the World Journal of Cardiology in accordance with the relevant recommendations: (1) Statistical methods are adequately and appropriately described verifying the results; (2) the statistical techniques were suitable and correct; (3) Only homogeneous data can be averaged. Standard deviations are preferred to standard errors. The number of observations and subjects (n) is given. Losses in observations, such as drop-outs from the study, are reported; (4) Values, such as ED50, LD50 and IC50, have the 95% confidence limits calculated and have been compared by weighted probit modeling (using the functions described by Bliss and Finney); and (5) The word “significantly” is replaced by its synonyms (if it indicates extent) or the P value (if it indicates statistical significance).

Prof. Jan Gabinsky,

Director

Ural Institute of Cardiology, 8<sup>th</sup> March street, 78A, Yekaterinburg 620144, Russia
