

19 of October of 2023

The statistical analyses of the manuscript entitled **“Adding vortexing to the Maki technique provides no benefit for the diagnosis of catheter colonization or catheter-related bacteremia”** were performed by Alejandro Jimenez Sosa (PhD). I am expert in biostatistics and research methodology, and I am the senior technician of the Research Unit responsible for the Biostatistics Area at the Hospital Universitario de Canarias (La Laguna, Santa Cruz de Tenerife, Spain) (Email: ajimenezsosa@gmail.com)

Sincerely yours,

Alejandro Jimenez Sosa
