

Biostatistics Statement

This is to verify that the statistical methodology in the manuscript titled “Migraine in Physicians: A Cross-sectional Insight into Prevalence, Self-awareness, and Knowledge in a Tertiary Care Center of Pakistan” is reviewed by me. And I found the methodology, tests employed, terms used, and explanation of results satisfactory and up to the mark with biostatistics standards.

My name is Hassan Choudry and I am one of the authors of the project. I have background and training in biostatistics from Stanford, and Johns Hopkins. I am currently working towards finishing my Masters in Public Health (MPH) degree from Imperial.

Hassan Choudry MD.
