Study Description

Go to

Brief Summary:

Helicobacter pylori (H. pylori) infection is one of the most common infectious diseases in humans.

Condition or disease	Intervention/treatment	Phase
Inflammatory Bowel Diseases	Diagnostic Test: Colonoscopy and biopsy	Not Applicable

Detailed Description:

Several bacterial and viral agents may have a role in the aetiology of IBD. In theory, H. pylori infection could be involved in IBD by inducing alterations in gastric and/or intestinal permeability or by causing immunological derangements resulting in absorption of antigenic material and autoimmunity via various immunological pathways.

Study Design

Go to

Study Type : Interventional (Clinical Trial)

Estimated Enrollment : 60 participants

Allocation: Non-Randomized

Intervention Model: Parallel Assignment

Masking: None (Open Label)

Primary Purpose: Diagnostic

Official Title: Detection of Helicobacter Pylori in Colonic Tissue in Newly Diagnosed Ulcerative Colitis Patients

Actual Study Start Date : March 1, 2017

Estimated Primary Completion Date : August 2019

Estimated Study Completion Date : December 2019

Arms and Interventions

Go to

Arm	Intervention/treatment
Active Comparator: Colonoscopy and biopsy IBD patients	Diagnostic Test: Colonoscopy and biopsy Colonoscopic biopsy were taken from the rectum, the sigmoid, descending, transverse, ascending colon, and the cecum of each patient.
No Intervention: Colonoscopic biopsy Non IBD patients	

colonoscopic biopsy	
---------------------	--

Outcome Measures

Go to

Primary Outcome Measures :

1. Number of patients with Helicobacter [Time Frame: 6 months]

Number of patients with Helicobacter

Eligibility Criteria

Go to

Information from the National Library of Medicine

Choosing to participate in a study is an important personal decision. Talk with your doctor and family members or friends about deciding to join a study. To learn more about this study, you or your doctor may contact the study research staff using the contacts provided below. For general information, [Learn About Clinical Studies](#).

Ages Eligible for Study:	Child, Adult, Older Adult
Sexes Eligible for Study:	All
Accepts Healthy Volunteers:	No

Criteria

Inclusion Criteria:

- newly diagnosed ulcerative colitis

Exclusion Criteria:

- Other diagnosis
