Selecting the best strategy of treatment in newly diagnosed advanced-stage ovarian cancer patients

Lucas Minig, Cristina Zorrero, Pablo Padilla Iserte, Andres Poveda

#### Abstract

Although it is assumed that the combination of chemotherapy and radical surgery should be indicated in all newly diagnosed advanced-stage ovarian cancer patients, one of the main raised questions is how to select the best strategy of initial treatment in this group of patients, neoadjuvant chemotherapy followed by interval debulking surgery or primary debulking surgery followed by adjuvant chemotherapy. The selection criteria to offer one
