

30283-Data sharing statement

Autoantibody profiles in autoimmune hepatitis and chronic hepatitis C identify similarities in patients with severe disease

Sulimani, Iraq, 13th November, 2016

I can confirm, on behalf of all the authors that if received a written request, for scientific purposes, we would be able to share the (anonymized) raw data used in this manuscript.

Yours truly,

A handwritten signature in black ink that reads "Kawa Amin". The signature is written in a cursive style with a long, sweeping underline.

Kawa Amin
