Prospective study

Title: Video recording of neonatal resuscitation: a feasibility study to inform widespread adoption

Sub: Submitting the manuscript for publication "Data sharing statement"

Dear Lian-Sheng Ma

The REB approved our study as a quality improvement study with waiver of consent (10-376) and the hospitals' Quality and Patient safety Committee approved this project with guidelines on functioning of Neonatal Resuscitation Quality assurance Activity Committee. As per the guidelines, we were allowed to preserve the reports and issues arising out of the neonatal resuscitation. However video clips, patient and care giver individual identifiers were to be deleted within 14 days of video recording. Thus all data supporting the study are provided in full in the results section of the manuscript, whereas video recording clips are not available.

Thanking you

*P.S. Sandesh Kiran*
