INFORMED CONSENT STATEMENT

Title: Barrett's Esophagus with High Grade Dysplasia is Associated with non-Esophageal Cancer

Manuscript Type: retrospective cohort study

Informed consent waiver: This study has been approved by the Tel Aviv Medical Center Institutional Review Board (protocol number 0022-09). Clinical, endoscopic, histologic and cancer morbidity data were collected anonymously. Since only retrospective data were acquired, informed consent was waived.

Respectfully,

Dr. Revital Kariv (corresponding author)

Dr. Nir Bar
