

## **Informed Consent Statement**

Title of Study: Initial Suction Drainage Decreases Severe Postoperative Complications after Pancreatic Trauma: A Cohort Study

This is a retrospective study, and patients were not required to give informed consent to the study because the analysis used anonymous clinical data that were obtained after each patient agreed to treatment by written consent.

Please contact me if you have any queries.

Sincerely,

Chief investigator: Wei-Wei Ding, Division of Trauma and Surgical Intensive Care Unit, Research Institute of General Surgery, Jinling Hospital, Affiliated Hospital of Medical School, Nanjing University, No. 305 East Zhongshan Road, Nanjing 210002, Jiangsu Province, China.
