**Manuscript Type:** Original Article

Retrospective Cohort Study

**Gastric peritoneal carcinomatosis – a retrospective review**

**Informed consent statement**

No informed consent was deemed necessary as majority of the patients we studied have passed away at the point of the study. Furthermore, the study involved a retrospective electronic medical record review, with no patient identifiers included in the results presented, hence bearing minimal risk to the patients included in the study.

Yours sincerely,

Adj Assoc Prof Teo Ching Ching Melissa
