

Study title: Prevalence and risk factors of lymphatic dysfunctions in cirrhosis patients with refractory ascites

Consent by the patient

I have been informed to my satisfaction, by the attending physician, the purpose of the present study and the nature of follow-up, including the laboratory investigations to be performed to monitor and safeguard my body functions. I have been explained about all the tests, which I may have to undergo during this study. I also understand that whatever clinical material (blood samples, and other clinical data) is collected from me can be used for testing and analysis at a later date.

I am aware about my right to opt out of the study at any time during the course without having to give any reasons for doing so.

I, exercising my free power of choice, hereby give my consent to be included as a subject in this study.
