**Re: RESECTION MARGIN INFLUENCES THE OUTCOME OF
PATIENTS WITH BILOBAR COLORECTAL LIVER
METASTASES IN AN ERA OF MULTI-DISCIPLINARY
THERAPY**

We would like to submit this manuscript titled above for publication in your journal.

All the authors have approved the manuscript and there is no conflict of interest to declare.

This study has been registered and approved by the Clinical Audit Department, Nottingham University Hospitals NHS Trust. Since this is a retrospective study, individual patient consent was not required, and all local ethical guidelines with respect to retrospective studies in this Trust were adhered to.

Informed consent statement: since this is a retrospective study, individual patient consent was not required, and all local ethical guidelines with respect to retrospective studies in this Trust were adhered to.

If there is any further information you require, please contact us.

Thank you for your cooperation.

Yours sincerely,

A handwritten signature in black ink, appearing to be 'D. Gomez', enclosed within a large, stylized oval loop.

Mr. D. Gomez
