

CONSENT FOR PUBLICATION OF CASE STUDY REPORT

What is a Case Study Report?

A Case Study Report is a description and explanation of an individual patient's medical diagnosis and treatment, considered to be of educational value for other health professionals. Reports are intended to be published or presented in forums aimed mainly at health care professionals (e.g. in a medical journal, thesis, or at a conference), although they are usually publicly available.

What is this Case Study Report about?

Salmonella infection – potential cardiac complications of myocarditis / pericarditis

Where could this Case Study Report be published?

No planned journal so far.

Will people who read the Case Study Report know who it is about?

The report will be published without the name of any patient and every attempt will be made not to include details that could identify who the report is about. However, complete anonymity cannot be guaranteed. It is possible that somebody somewhere - perhaps, for example, somebody who looked after you/your child/relative, in hospital - may identify you/them.

Can you change your mind?

You can withdraw
thereafter it will r

re the manuscript has been committed to publication, but
consent.
