

Rush University Medical Center

Factor Selection Survey

You are being asked to participate in a research study. Before you give your consent to volunteer, it is important that you read the following information to be sure you understand what you will be asked to do.

Investigators

Alan Blank, M.D., M.S

Purpose of the Research

The purpose of this research is to better inform the orthopedic oncology team here at Rush University Medical Center about what resources their patients use to find a physician. We hope that the results of this survey will allow the orthopedic oncology team to better the experience of new patients.

Procedures

If you volunteer to participate in this study, you will be asked to complete a short, two-minute survey.

Potential Risks or Discomforts

There are no foreseeable risks associated with the study. Your responses to this survey are anonymous and will not affect your receipt of healthcare services from Rush University Medical Center.

Potential Benefits of the Research

There are no direct benefits to this research. However, we hope that the results of this study will allow our orthopedic oncology team to engage in better outreach to new patients by attempting to understand what resources they use.

Confidentiality and Data Storage

Confidentiality will be maintained, and data will be stored on a secure network. Your name, age, diagnosis, or any other medical information will be stored.

Participation and Withdrawal

Your participation in this research study is voluntary. You may refuse to participate or stop participation at anytime without penalty. To stop the survey, you can simply exit the survey screen.
