

**Name of Journal: *World Journal of Orthopedics***

**ESPS Manuscript NO: 26168**

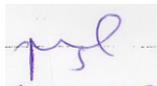

**Manuscript Type: Case Report**

**Compartment syndrome following total knee replacement: A case report  
and literature review**

***Informed consent statement***

Unfortunately in December 2014, the patient died from causes unrelated to the contents of this case report. Written consent was therefore not obtained despite the patient verbally agreeing to publish it in the immediate postoperative phase. However, in light of the importance of the article message, we have included no identifiable patient information and feel this report should still be published.

Mr Mohamed Sukeik
