Prospective study

Title: Video recording of neonatal resuscitation: a feasibility study to inform widespread adoption

Sub: Submitting the manuscript for publication "Informed consent statement"

Dear Lian-Sheng Ma

The hospital research ethics board (REB) approved our study as a quality improvement study with waiver of consent (10-376). The rationale being that video recording in neonatal resuscitation had already been proven to be beneficial. The goal of this study was implementation of established proven practice as a quality of care practice. Subsequently the hospital's Quality and patient safety steering team, approved our project. We have ensured that all details that might disclose the identity of subjects are omitted or presented in aggregate, as per REB approval.

P.S. Sandesh Kiran

Thanking you

P.S. Sandesh Kiran
