

Dear Editor,

This is a survey study performed by sending questionnaires to the transplant center directors in Turkey. We sent the questionnaires by e-mail. The results were collected anonymously by the surveymonkey program and inclusion was based on the preference of the individual. The participants were informed about the survey content with a short introductory e-mail prior and no consent was necessary as it is a voluntary participation.

Thank you.

Kind Regards,

Sanem Güler Cimen, MD, MSc
