

Comité d'Ethique Hospitalo-Facultaire Universitaire de Liège (707)

To Professor Pierre Damas, Intensive care Unit,

Dear Colleague

I can confirm that your study « Incidence and risk factors for early renal dysfunction after liver transplantation » will be examined by our Ethics Committee at our next meeting on September 15.

Since this is a retrospective study, I can already confirm you that no informed consent by the patients is needed.

Sincerely,

Vincent Seutin
President of the Ethics Committee
CHU of Liège
