| <b>IACUC PROTOCOL #:</b>     | <b>11043</b>   |
| <b>IACUC PROTOCOL TITLE:</b> | <b>PROBING GI TRACT RESPONSES TO SALMONELLA<br/>TYPHIMURIM IN GPX AND NADPH OXIDASE DEFICIENT<br/>MICE</b> |

**TO:** Binghui Shen, Ph.D., Principal Investigator  
City of Hope - Cncr Genetics - Epigenetics-BRI

**FROM:** Susan Kallay, M.S.  
Director, Office of Laboratory Research Subjects Protection

**Signature applied by Susan Kallay on 12/03/2015 03:32:17 PM PST**

**DATE OF NOTICE:** December 03, 2015

**DATE OF REVIEW:** 12/01/2015

**SUBMISSION:** IACUC Protocol Continuation

**SUBMISSION REFERENCE#:** 123075

**DECISION:** Protocol Approved From 01/10/2016 Until 01/09/2017

**As the PI of this study, you are responsible for the following:**

- 1. You are required to make sure that all research staff involved in the conduct of this animal research project have read, and have a clear understanding of the IACUC approved protocol procedures and requirements.**
- 2. You must obtain IACUC approval prior to initiating any changes in the protocol. (No changes can be initiated until IACUC approval has been secured.)**
- 3. You are required to report any unexpected problems involving animals as soon as you are aware of them. This report should be made to the IACUC.**

**If concordance review of an associated grant application is required, please contact the Director of Office of Laboratory Research Subjects Protection.**
