Grenoble, May 5th 2017

Direction : Frédéric SAUDOU

Object : Institutional animal care and use committee statement

We didn't really perform experiments with animal subjects. Tissues were just removed post mortem for immunofluorescence and westernblot analyses. However, animal experimentation was carried out in accordance with the European Community Council directives of November 24, 1986 (86/609/EEC) and with the French guidelines on the use of living animals in scientific investigations with the approval of the "Grenoble Institute of Neurosciences ethical committee".
