RE: Maythem Saeed, PhD  
IACUC Application: AN091312-01

To Whom It May Concern,

The Department of Radiology and Biomedical Imaging Committee for Review of Animal Research has reviewed the proposal by Dr. Saeed, "Exploring the potential of MR-guided high frequency focused ultrasound (MRgHIFU) in ablating targeted lesions".

The Committee finds this to be acceptable. Attached is the appropriate signed Scientific Merit Review Form.

Sincerely,

A handwritten signature in black ink that reads 'S. Majumdar' followed by a horizontal line.
