This approval form must be included in all research papers and must be signed by the thesis investigator.

Project Title: Analysis of short-term prognostic factors of hepatitis B virus-related acute-on-chronic liver failure

Principal Investigator: Dr. Liguang Liu

Department: Department of Infectious Diseases

Description of Proposed Project:

Acute-on-chronic liver failure (ACLF) refers to a syndrome caused by various triggers on the basis of chronic liver disease. To explore the independent predictors of short-term prognosis in patients with hepatitis B virus (HBV)-related acute-on-chronic liver failure (ACLF) and to establish a predictive short-term prognosis model for HBV-related ACLF.

PI Certification:

I certify that the information provided above is accurate. And I certify that all procedures described in this application are complete and accurate. All activities associated with this research project will be performed in accordance with the 910th Hospital of Chinese People's Liberation Army Institutional Guidelines and Clinical Regulations. I agree to immediately report all unanticipated adverse affects of the study on subjects to the Chairperson of the the 910th Hospital of Chinese People's Liberation Army Institutional Review Board.
