Medical ethics committee approval

Professor Xu Xiaoyan's research team's project "Clinical Retrospective Study of Pelvic Leiomyosarcoma" involves the collection of clinical case data. Considered by the Medical Ethics Committee of Tongji Hospital, Tongji Medical College of Huazhong University of Science and Technology, it was unanimously agreed that the design of the research program conformed to the principles of Helsinki Declaration and fully respected the right of informed consent of the subjects and their families. The experimental methods used in the research process are advanced and scientific, and the data collecting process conforms to the medical conventions, and the protection scheme for the subjects is formulated.

The project meets the requirements of medical ethics. Commission agrees to carry out the project.
