### Consent Letter

The Aggeu Magalhães Institute, Oswaldo Cruz Foundation (Fiocruz) unit in Pernambuco-Brazil, agreed to participate in the project Bone Marrow-derived Monocyte Infusion Improves Hepatic Fibrosis by decreasing Osteopontin, TGF- $\beta$ 1, Interleukin-13 and Oxidative Stress", coordinated by Sheilla Andrade de Oliveira, researcher at Aggeu Magalhães Institute. In view of this, it provided all the necessary infrastructure for the full realization of the project.
