**SUBJECT: CLINICAL RESEARCH PROJECT APPROVAL: DIABETES MELLITUS AS AN
INDEPENDENT PREDICTOR OF SHORT TERM OUTCOME IN ELDERLY PATIENTS
UNDERGOING LIVER TRANSPLANTATION**

In reference to the attached research proposal, the Chairman of OTC Clinical Research Committee reviewed your proposal entitled "**Diabetes Mellitus as an independent predictor of short term outcome in elderly patients undergoing liver transplantation**" on 9 August 2020.

We are delighted to inform your that your research proposal has been approved by OTC Clinical Research Committee.

Furthermore, you can start your study once you obtained approval from the Ethic Research Committee of Research Centre. If your study is not completed before **01 August 2021**, we will need to progress report of your study.

Thank you.
