Re: RESECTION MARGIN INFLUENCES THE OUTCOME OF PATIENTS WITH BILOBAR COLORECTAL LIVER METASTASES IN AN ERA OF MULTI-DISCIPLINARY THERAPY

We would like to submit this manuscript titled above for publication in your journal.

All the authors have approved the manuscript and there is no conflict of interest to declare.

This study has been registered and approved by the Clinical Audit Department, Nottingham University Hospitals NHS Trust. Since this is a retrospective study, individual patient consent was not required, and all local ethical guidelines with respect to retrospective studies in this Trust were adhered to.

Institutional review board statement: this study has been registered and approved by the Clinical Audit Department, Nottingham University Hospitals NHS Trust.

If there is any further information you require, please contact us.

Thank you for your cooperation.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'D. Gomez', enclosed within a rectangular border. The signature is stylized with a large, sweeping initial 'D' and a horizontal line that loops back under the name.

Mr. D. Gomez
