Dear whomever it may concern:

Regarding the case report by Dr. Katherine Yu and Dr. Arnold Seto, entitled "Three-dimensional OCT reconstruction of bifurcation stenting using the Szabo anchor-wire technique, the VA Institutional Review Board has determined that as long as case reports do not include any patient-identifiable information, that the report does not require IRB review.

Sincerely,

A handwritten signature in blue ink, appearing to read "Elizabeth Rundgren". The signature is fluid and cursive, with a large initial "E".

Elizabeth Rundgren
