Liver and Intestinal Transplant Unit  
Austin Health

Case Study: Mycophenolate Mofetil toxicity mimicking acute cellular rejection in a small intestinal transplant

Dear Dr Testro,

Thank you for your application and email dated 05 December 2016. It is our understanding that this application is a Case Study project involving the reporting of a case in a medical journal to describe and explain the way in which a patient has experienced a particular medical condition. We note that you have received written consent from the patient. This project does not require submission to the Austin Health Human Research Ethics Committee.

Please note this letter only pertains to this Case Study project being conducted at Austin Health.

**Documents Noted:**

Case Study Consent Form dated 29 November 2016

Yours sincerely,

**Ms Kelsey Dalton**  
**Research Ethics Officer**
